

# Pairing Smart Devices (Z-wave) with Smart Home

**Note:** Zigbee devices are not compatible.

Smart devices can be set up using one of the following methods:

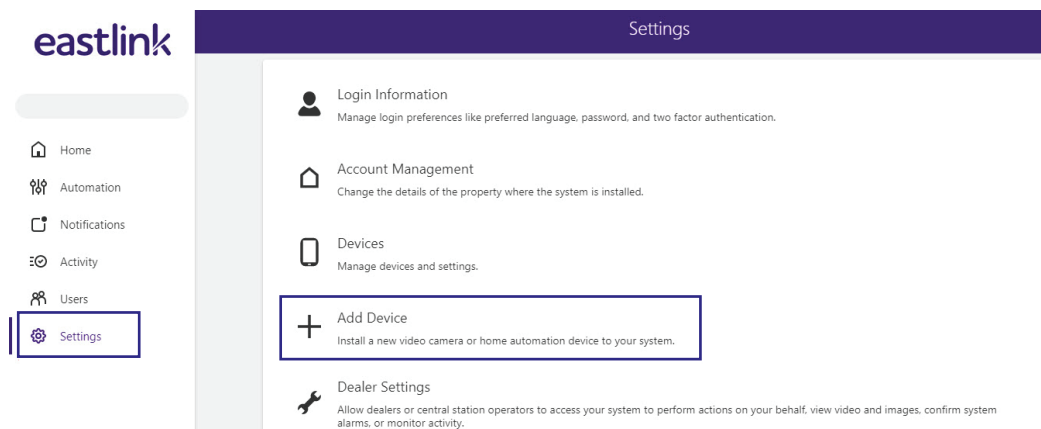

## Alarm.com app

1. Login to the **Alarm.com app** on your smartphone.
2. Click **“Settings”** (3 bars in the top left hand corner).
3. Click **“Add Device”**.
4. Select the type of device you want to add. If you don't see it in the list, select Other. Click on the device.
5. Follow the instructions in app until completed.

## Web Portal

1. Login to web portal [alarm.com/login.aspx](http://alarm.com/login.aspx) on your computer or tablet.
2. Click **“Settings”**.
3. Click **“Add Device”**.
4. Select the device you wish to add – if you do not see it in the list, select Other. Click on the device.
5. Follow the instructions on the web portal until completed.

## Smart Hub

1. Make sure the Smart Hub is plugged into power and Ethernet cable is connected to the modem. The top 3 lights should be solid.
2. Press & hold the **“Z-wave”** button on the side of the Smart Hub for 10 seconds. The Z-wave light will begin flashing.
3. Press the **“learn”** button (refer to device’s instructions) on the Z-wave device you want to add. It should now be paired to the Smart Hub.
4. Go to the **Alarm.com app** or **web portal** to access your device. Refresh if you don’t see it right away.
